5.	Statistical Office of the Republic of Serbia	Production of quarterly publication Trend 025211	From the aspect of time series analysis, the objective of this publication is to provided economic policy holders with update information on current trends in the economy, as well as on their long-term and cyclical behaviour, in form of rounded quarterly data by presenting major economic signals via modern and advanced graphic solutions for presentations and dissemination.	Quarterly; previous quarter					Law on Official Statistics	Republic of Serbia	20.03, 20.06, 20.09 и 20.12.
6.	Statistical Office of the Republic of Serbia	Development of the system of leading indicators 025214	The concept of leading composite indicator s represents an analytical tool in forecasting cyclical economic trends. It includes detection of turning cyclical points, minimum and maximum, in order to reach an anticipation phase of the economic cycle of the national economy in the next period. Each of the developed SORS composite indicators by sector is made of a large number of weighted indicators of each sector individually. When detecting the variables that were included in the presented composite indicators all macroeconomic areas and surveys on business expectations in Serbia were analysed. The detection is done according to Eurostat methodology. The developed system of composite leading indicators of the SORS is ahead of economic activity, on average, by about six months, and combined with econometric models, enables quantitative evaluation of the dynamics of annual growth rate or the economic activity on the short-term, on quarterly and annual level.	Quarterly; previous quarter				Statistical surveys of the Statistical Office of the Republic of Serbia	Law on Official Statistics	Republic of Serbia	
7.	Statistical Office of the Republic of Serbia	Analysis of turning points of the economic cycle 025209	The economic cycle represents period fluctuations of the economic activities measured by GDP (or by anohter indicator) and expressed in deviation from long-term trend. ### 8. Data security and statistical confidentiality

1.	Statistical Office of the Republic of Serbia	Data security and statistical confidentiality 025241	The official statistics realizes full protection of the rights of data providers and statistical units. The principle of confidentiality covers data protection concerning an individual statistical unit, whereby individual data can be used only for statistical purposes. The Law on Official Statistics stipulates that responsible statistics producers remove identifiers of statistical units once the collected data are processed. Questionnaires and other documents containing individual data obtained through conducted statistical surveys should be destroyed, after their input, coding and data processing in line with valid regulations. Data collected, processed and stored for statistical purposes are confidential when a physical or legal person can be directly or indirectly identified by name, address or identification number. Confidential data cannot be used to establish the rights and create an obligation to a reporting unit. Responsible statistics producers can provide R&D institutions, on written request, with individual data without identifiers, but are due to keep record on such users,	Континуирана					Закон о званичној статистици

<sup>1)</sup> The territorial level is defined according to the Law on the Territorial Organization of the Republic of Serbia ("Official Gazette of the RS ", number 129/2007, 18/2016 and 47/2018) and Regulation on the Nomenclature of Statistical Territorial Units ("Official Gazette of the RS", number 104/09).

## PLAN OF OFFICIAL STATISTICS FOR 2021

Ordinal number	Responsible official statistics producer	Title and code of the survey or activity	Brief content of the survey or activity	Periodicity and reference period or date	Data source				Obligation to provide data	Territorial level of published data <sup>1)</sup>	Deadline for preliminary data
					Direct data source		Administration and sources and deadline for reception	Statistical sources			
					Method of data collection and questionnaire designation	Reporting units and deadline for data transmission					
1	2	3	4	5	6	7	8	9	10	11	12

as well as on the use for which the data are sent to them. The protection of confidential data is enabled by restricting the access to confidential data because it is limited to persons who produce official statistics during performance of their tasks, up to the level to which those data are necessary for official statistics production. Responsible official statistics producers shall take all regulated administrative, technical and organizational measures necessary to protect confidential data against illegal access, reveal or use

## VI. STRATEGIC AND MANAGEMENT ISSUES OF THE OFFICIAL STATISTICS

### 1. Legal framework

1.	All responsible official statistics producers	Legal framework 025227	The Law on Official Statistics regulates the area of statistics, i.e. the production and dissemination of data and information of the official statistics, as well as the organization of the system of official statistics of the Republic of Serbia (definition of the official statistics, data providers protection; basic principles; responsible statistics producers; preparation for the five-year statistical program and annual applicable plans; way of publishing the results of statistical surveys and data use method of data collection and processing and storage; obligation to create statistical register; requirements for data and information dissemination; data confidentiality and protection of confidential data; cooperation with international statistical organizations, etc.). The law is harmonized with the main principles	Continuous
